# Kelvin: The Chosen One

## Introduction

### Brief Information

My name is Kelvin and I am 20 years old. I like drawing and playing computer games. I also love playing music instruments such as piano and drums. I learnt Taekwondo before and my hobby is solving rubic's cubes.

About my education background, I studied at S.K.H. Lam Kau Mow Secondary School for 6 years. I am studying at Caritas Institute of High Education now.

My **career objectives** are to create my own computer game, and to draw my own manga. Then release them to the public to allow people to enjoy.

### Thankful People

I would like to give thanks to three **thankful** people in my life, as they helped me so much in my career.

- My Mother
- My Father
- My Career Teacher

## My Creations

### Drawing

I draw a lot since I was small. Here is one of my favourite drawing which consists of many adorable animals.

I also like to draw mangas, below shows some of my creations.

Draft

Black & White

Colored

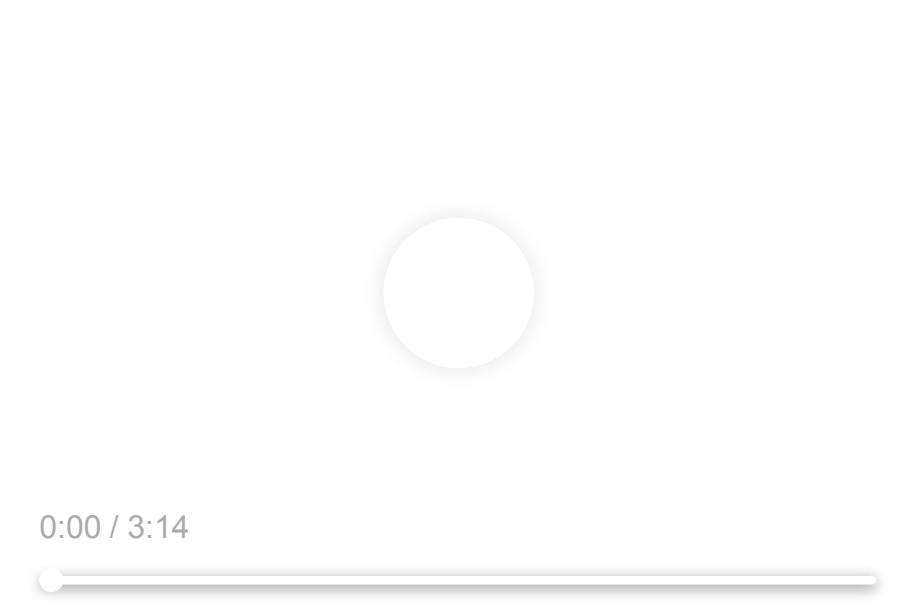

### Animation

This is a stickman fighting animation named "The Flash" which I created when I was in secondary school. It is my first animation done so it was not good in quality

Actually I started working on it right after I graduated from primary school. I uploaded the animation to my Facebook page when it is completed.

I like stickman animation since I was small and that's the reason I create stickman animations. There are some more similar animations created by me too.

## Music

As there are drawings and animations. I also attempted to create musics for my creations, here is one example.

0:00 / 1:56
